

“The child has a different relation to his environment from ours. Adults admire their environment, they can remember it and think about it, but the child absorbs it. The things he sees are not just remembered; they form part of his soul. This is a vital kind of memory, which one does not consciously remember, but absorbs images into the individual's very life.” – Maria Montessori *The Absorbent Mind*

RMS Daily Schedule

Part Day Program 8:45-2:30

- ◆ We structure our day because children thrive on routines. This is the only way a child is able to tell what will happen next in his or her day. Within the daily routines, the child has free choice of many different types of activities.
- ◆ The child always has the option of working with a small group of children or working alone.
- ◆ The activities and materials throughout the classroom are conducive to brain based learning.
- ◆ Art is an integral part of our curriculum. It is integrated into all the areas of the classroom. Art exploration with different mediums such as colored pencils, chalk, pencils, paints, crayons, markers, and a variety of collage materials are available to the child throughout the school day.
- ◆ Circle time is used as the transition period before we start any new activities. The circle helps to bring all of the children's energy to the same level, and provides the children with group time fun. However, if a child wants to continue with their activity rather than to join in the circle, they are allowed to do so.
- ◆ We always give several “cues” when we are getting ready for circle time. The “cues” help give the child the idea that there is going to be a change in the activities. These “cues” make it possible for a child to finish whatever activity he or she is working on.
- ◆ Self-serve snack is available from 9:30 a.m. through 11:00 a.m.

8:45

Children arrive.

8:45 – 9:10

Group/Circle – Circle begins with Movement, Dancing and stretching. The Good -Morning song, Calendar, Weather, Classroom helpers, Songs, and Presentation of Montessori Materials
